Continuation of 11. does NOT place the application in condition for allowance because: it is still the Examiner's position Yokota teaches the processor is onl "adapted to" (not a positive limitation) trigger the device; whereas, the Yokota reference does positively teach sensors (10a-10b) that sense an impact (see arrangement in figs. 5a through 7c). In reply to this Action, Applicant is kindly invited to explitly enlighten the Examiner as to what is missing from col. 10, lines 41 - 67 in Yokota regarding the pedestrian-impact sensor. There is nothing contradictory in the Office action regarding element 10 in Yokota, i.e., element 10 works for both occupant of the vehicle AND external impact with an object or a pedestrian as supported by col. 10. It is believe the rejection of claims 1 - 19 is proper.
